The Fair

Everything is in readiness for the Annual Fair of the Lacombe Agricultural Society, which opens tomorrow. Never in the history of the Association has the number of entries been so great, and prize stock from all parts of the Province has been entered in the various classes. Ample accommodation has been provided this year by the addition of new buildings, and the crowded conditions of other years will be absent. There is in addition to the Fair proper, a large number of attractions, provided by Merry-makers from the large city Exhibitions, and we will have platform attractions worth while. The sports program, in which over \$2000 is hung up in prizes, will be good, and consists of horse races, foot races, baseball, tennis and basketball tournaments, etc. You will not be disappointed if you attend this year's Fair, so lay aside work and care and come to Lacombe.

The Regatta

Next Monday Regatta Day at Gull Lake, and a program suitable for the occasion has been prepared and may be seen in another part of the paper.

A TWO-FOLD DUTY

Many thoughtful mothers first give their children

Scott's Emulsion

regularly—and then take it themselves. It is a tonic-food that contains elements as useful to an adult as to a child. Build up your strength—try Scott's.

Peace Celebration

"Peace Day" was right royally celebrated by the citizens of Lacombe with a monster celebration at our popular summer resort, Gull Lake, on Saturday last. Although the weather was slightly unfavorable, some twenty-five hundred citizens of the district assembled, and the afternoon was spent in various kinds of sports. In the evening a monster bonfire, erected on a raft anchored out in the water, was lit, and the celebration was brought to a close by a dance in the pavilion. The Ponoka band had been engaged for the occasion, and provided music at intervals during the afternoon and evening. Owing to the rough state of the lake, the grand illuminated and decorated boat parade had to be called off, and this feature will probably take place at the Children's Regatta Saturday July 26. The committee in charge of the "Peace" celebration deserve much credit, especially Mr. Halstead (C.P.R. freight department), who was chairman, and who worked like a Trojan to make the affair a success.

Death of Dr. Harrington

After an illness of several months Dr. J. B. Harrington, one of Lacombe's oldest and most highly esteemed citizens, died on Saturday night last. The funeral was held on Monday afternoon at the residence and graveside, being conducted by Rev. A. T. Barr. Town and country turned out in large numbers to pay the last respects to our departed townsmen, and the funeral was the largest ever held here. The

Odd Fellows, of which order deceased was a valued member, were in attendance in a body. His wife and family of four young children are left to mourn the loss of a devoted husband and father, and the bereaved ones have the heartfelt sympathy of everyone.

The late Dr. Harrington came to Lacombe from Port Arthur, about eighteen years ago, and after practising his profession for some years, engaged in the fuel business, which he conducted up to the time of his death. He was a general favorite with all who knew him, and his loss will be keenly felt in our town.

Jas. Chiswell Dead

James Chiswell, an old timer of the district, died at Walla Walla Washington, on Wednesday, July 9th, from cancer. Deceased was 68 years old, and leaves a wife and family of eight children, all of whom reside in Alberta. Deceased came to Lacombe from England twenty-seven years ago and settled on the farm four miles east of Lacombe, where he resided until the time of his death. The funeral was held at Walla Walla, two sons being present. The sympathy of their many friends is extended to the bereaved family.

"Chase Me Charley"

At the Vet. Friday and Saturday.

Charlie Chaplin, while wandering along a highway, sees a girl attacked by a hobo. He rescues her and her father gives him a job on the farm. Charlie falls in love with the girl, but she has a sweetheart and he leaves, broken hearted.

He gets a job as a moving picture actor, but he cannot get his mind off the girl. Later he meets her while at work as a plasterer, she being in the city on a visit. But again he fails to win her and quits his job.

But once more he finds her, and at the third wooing he is partly successful. That is, he wins her love, but her father will have none of him. He wishes his daughter to marry a count.

They finally elope and after a long chase by the irate parent and police, are caught and the girl

CHIROPRACTIC

Why Chiropractors Specialize Upon the Spine (The Human Back-bone)

The Spine is the Chiropractor's special study. The properly trained Chiropractor is in the truest sense of the word A SPECIALIST. No other Health Science in existence pretends to give this vitally important part of the body the careful and conscientious consideration which is bestowed upon it by the CHIROPRACTOR. Modern Research has confirmed the importance of the Spinal Column as a decided factor in all matters pertaining to health. Careful and conscientious study of the subject by intelligent men throughout two decades has confirmed the theory beyond reasonable doubt that as a causative factor in relation to HEALTH and DISEASE, the SPINAL CORD and NERVES control the supply of vital energy passing from the brain to individual cells in every part of the body. The SCIENCE OF CHIROPRACTIC has finally attained a stage of progress in development and practice where it is being investigated, studied and adopted for exclusive practice by influential members of other Health modes, many of whom yet

mistakenly condemn the CHIROPRACTIC IDEA which their more progressive and less bigoted brethren in limited numbers accept, practice as a profession and urge upon their patients in quest of a HARMLESS AND HELPFUL HEALTH MODE.

INVESTIGATE CHIROPRACTIC—YOU ARE BOUND TO BELIEVE IN IT.

The Experimental Stage is Past. Sick people who are in a notion to try Chiropractic, but who are timid because they do not want to be experimented upon, can rest assured that the EXPERIMENTAL STAGE has long since passed. CHIROPRACTIC is an ACTUAL DRUGLESS SCIENCE which has been tried by thousands and which has proved its worth. The one important fact is that CHIROPRACTORS do not bother with the EFFECT. They ascertain the CAUSE of the TROUBLE and having done this proceed by CHIROPRACTIC ADJUSTMENTS to eliminate the cause. What is the result? Directly the trouble disappears. If you are sick, there is therefore no reason why you should not try CHIROPRACTIC. We know it will help you.

The Late Robert Kennedy

The following letter has been received by Mrs. Sherman, at present in Vermont from the mother of "Bob" Kennedy, well known here, who was killed in France last October, and we are requested to publish it.

12 Maristown Road, Edinburgh.

I received your letter this morning, and am writing at once to let you know about my dear boy. He was killed in action on October 1st 1918, by a machine gun bullet in the chest. His death was instantaneous. I was anxious to know if he lay and suffered, so I wrote and asked, and had a nice letter from the captain of his company, telling me all about it and where he is buried. I am also to get a photograph of his grave. He

Lively Game Between Rimbey and Ponoka

The Ponoka team added another victory to its long list when it defeated the Rimbey team on Wednesday last by a score of 7 to 4. From the spectators point of view, the game was one of the best of the season, being replete with good batting and brilliant fielding.

Play started in earnest, everybody getting down to business, Rimbey was the first to bat, and got away to a good start by securing 2 scores in the first inning. In the second inning they annexed another run.

Ponoka was held scoreless until the fourth inning, when Lloyd weakened. In this frame A. Mullins was safe on first and Mitchell started the fireworks by meeting one of Lloyd's fast ones on the nose for three sacks, scoring Mullins. Longman followed with a drive to centre which landed him safe on the keystone sack, scoring Mitchell. Hamby got his second hit of the game, Stephens and Russell were out and W. Mullins and Rohwer, both hit safely. After the smoke cleared away, Ponoka had six runs chalked up, and with Rohwer bending them over with good control, the final outcome of the game was never much in doubt.

W. Kutina played a star fielding game for Rimbey, and while it is hard to pick a particular star for Ponoka, the catch of a hard chance in field of Mitchell, the clean pick up and accurate peg of a hard ground ball to 2nd by A. Mullins and the clean fielding of two slow ones by Rohwer, helped to keep the large and enthusiastic crowd rooting from start to finish.

Mr. Miquelon of Wetaskiwin, handled the indicator to the satisfaction of all, which speaks well for his knowledge of the game and fairness.

The following is the line-up: Ponoka: Headley, 2nd; A. Mullins S. S.; Mitchell L. F.; Longman 3rd; Hamby, C.; Stephens R. F.; Russell, C. F.; W. Mullins 1st; Rohwer P. Rimbey: Kennedy L. F.; Ely C. Little 2nd; W. Kutina S. S. W. Connolly 1st; Easson R. F.; G. Kutina, 3rd; G. Lloyd, C. F.; A. Lloyd P.

Lacombe Creamery

There is just one reason why Canadian butter cannot dominate the Worlds Markets. That reason is "Quality" the control of which is in the hands of the producer and the Buttermaker. If the cream producers will patronize their local Creameries, where immediate manufacture takes place, quality, lower cost of production and consequently. Higher Prices to the Cream Producers is the result.

Always at Your Service, Highest Prices.

It's Up to You!

Why should you go through life with half sight, or poor vision? The other day I fitted a man with glasses who had gone through life so near sighted that he could not recognize a friend across the street. This man had never know the joy of clear vision, and it was a pleasure to see his delight when he viewed distant objects for the first time.

Then there is a person who has a headache after reading for a short time. It is more painful that the near sighted condition, but yields equally when proper glasses are worn. If you are having trouble with your eyes, have them tested.

JESSE FRASER AGENCY, LACOMBE

Why the Case Tractor Leads All Others

- 1 One piece cast main frame, forming dustproof housings for rear axle, ball pinion shaft, transmission and the bearings for these parts. Also a base for motor. This construction brings rigidity and prevents disalignment.
- 2 All traction gears are cut steel, enclosed and running in oil. No bevel gears, chain, worm or friction drive parts.
- 3 Case air washer delivers clean air to carburetor. No grit nor dust gets into cylinders to minimize their efficiency and shorten their life.
- 4 Four-cylinder Case valve-in-head motor. Removable head. Motor is set crosswise on frame, affording use of all straight spur gears. This conserves power.
- 5 Case Siphon Thermostat control cooling system and insure complete combustion of kerosene in the motor. Prevents raw fuel from passing by the pistons and diluting oil in crank case.
- 6 Weighs about 3,400 pounds; little more than a team of horses. Low and compact with short wheelbase. Turns in 22 ft. circle. Stays on all fours.
- 7 Rated 10 horsepower on draw bar, but develops nearly 14 horsepower. Rated 18 horsepower on the belt, but develops about 24 horsepower. This insures abundant reserve power.
- 8 Belt pulley mounted on the engine crank shaft. No gears used to drive it. Pulley is part of the tractor, not an extra-cost accessory.
- 9 All interior motor parts lubricated by a combination pump and splash system. Speed governor, fan drive and magneto are dustproof and well oiled.
- 10 Complete accessibility. No dismantling necessary. Removable covers permit you to get at parts quickly.
- 11 Hyatt roller bearings in rear axle, ball pinion shaft and transmission case. Kingston ignition and carburetor. Five piece radiator with a cast frame. Core, fan and copper tube; non-clogging type.

S. W. 1-4 sec. 16-42-27, w. 1. Price \$150 per acre, and terms half cash, balance in three years, equal payments.
Address: J. A. Montgomery, 61 Aberdeen, Ave. Westmont, Montreal. July 3c.

Fifth Semi-Monthly Crop Report.

A survey of the crops on June 30th showed that the important wheat lands of Southern Alberta were in a precarious situation. This unfavorable condition in the south country has since been confirmed and intensified.

In the south the situation is briefly this: There was sufficient moisture from snow or spring rains to germinate the grain and the crops came up satisfactorily. There was not sufficient moisture below to constitute a reservoir for the steady supply of moisture to crops for subsequent growth and there has not been sufficient rain since.

There have been showers over many parts of the south since that but in no case have these showers been heavy enough to saturate the soil to the depth of about one inch. They have quickly evaporated without becoming effective to the furthering of crop growth, as it needs to go at least four or five inches down. The crops that had reached some height and were standing still at the end of the month have since gone back. High winds have persisted throughout practically all of Southern Alberta and the grain that is headed out is bleached at the top of the head, is empty at the bottom of the head and only has a few grains in the middle.

There are not a great many localities that will be able to even supply their own seed in the country tributary to the Crows' Nest Railway and on the Alderside line. Crops that grew fairly well at points between Lethbridge and Medicine Hat and on the Suffield branch, likewise on the main line of the C. P. R. have been subject to steady reduction for the past three weeks.

Many people are holding their crops in the hope that they may get seed for next year but they would be better to cut them for feed where they have reached any height and trust to some other arrangement for seed next spring. There are limited localities also where crops will furnish something more than seed. The country on the main line of the C.P.R. tributary to the railway between Glendon and Bassano and north to the Goose Lake line between Rockyford and Drumheller will have some crop but cases of this kind are not sufficiently numerous to affect the unfavorable conditions over the whole area. There is nothing to be said except that the grain crop in Southern Alberta is a failure. The pasture and hay are equally light and the situation is bad for live stock and equally precarious for the health and welfare of settlers and their families. The scarcity of hay in Central Alberta and the prices that will have to be paid for it are standing still and it is impossible for southern stockmen to buy Alberta hay to feed their stuff. The chances for disposing of the stock are also poor. The local markets can not absorb and re-distribute the live stock of the south and the prices obtainable by southern farmers for their stock are not what they should be. There seems a need of finding outside market for the stock. Flax is standing still and will not realize very much of a crop.

On the Noble farm there is a large area of rye. This crop has withstood the drought better than wheat and oats.

The opposite end of the province, namely, the Peace River country continues to have bountiful rains and high temperatures. The crop is making good progress and it is generally heavy. In a few

localities there is almost too much moisture. While the conditions in the Peace River are good the total area is not of importance compared with Central or Southern Alberta.

Central Alberta is in about the same situation as it was at the time of the last report. The eastern side continues dry and all of the country needs rain, but considering the absence of general rains the crops in most parts of Central Alberta are standing up pretty well. They have made some growth since last report and there is no new limiting factor to the success of the crop but it will scarcely be a full crop.

Wheat in Central Alberta that has been sown on breaking or on summer-fallow will be considerably over half a crop. On spring plowing it will not be so good. The oat crop is most important crop of Central Alberta. The early oats are rather short and can not be a real good crop. The oats that have been sown late have rather better prospects. They are showing strong and have plenty of time for a good crop yet if we have a reasonable amount of rain. Six weeks of favorable weather would make things fairly satisfactory in Central Alberta.

The hay crop is quite light as to both native and tame hay and there will be practically no surplus in any part of the province for the southern stockmen. Stock in Central Alberta is looking well. The characteristic troubles with the central district is that it has not had any heavy rains. There have been a number of small showers over most parts of this division. They have benefited crops a little and have kept the weather cooler and high winds have ceased, but for even an ordinary harvest good rains are necessary.

J. McCall
Chief Publicity Commissioner.

Wanted to Rent
Furnished cottage in Lacombe for fall and winter. Apply to Western Globe Office.

Tenders for Fencing
Tenders invited for fencing 90 acres at Gull Lake. Owner will furnish wire and posts. Apply to P. W. Dyde, Aspen Beach. C2-

\$10.00 A Head Reward

- 31 Boys' Rowing Doubles (not yet 16 years)—1-4 mile straightaway.

Sailing Races will take place in the forenoon.

Other events begin sharp at 1 o'clock in front of Lake View Hotel.

First and second prizes for each event.

The order of any event may be changed by the committee.

SID AND HIS LETTERS

"Sid" As the Author Knew Him

—O—

Laughable letters from a boy from the slums of a city, written to his friend Bill.

Written by Barney Halpin.

—O—

Now that the summer weather is upon us there is not many things of interest to us about the life on the farm, it goes on in the same notch day after day, and week in and week out, until the harvest starts. So you will all excuse Sid for not writing to Bill and will no doubt be interested in the story of Sid's life, where I met him, where I met Bill and in fact everything concerning the life of our hero.

First of all I will say that Sid is entirely a fictitious character and his name is of no importance in the story on the whole, it could just as well be Sam, Jim, Jack or Jerry for all the difference it would make, but his life is about the same as thousands of other "Sids" in the greater cities.

Sid was a boy about eight years old when I met him first, his mother was—No she was not dead, and she didn't have a husband who was a drunkard and who came home at night and beat her. In fact she was a big lively weight and about two-hundred pounds, and her husband was just an ordinary laborer. They, like so many of the working class in the cities did not think that their children needed schooling and hence we see the reason for "Sids" some what bad breaks in his spelling and grammar.

Sid was a good boy though, and since the day I first met him I always have been more or less attached to him and his activities. The one trait I always admired in Sid was his fondness for dogs and also his fondness for his friends. He would pick up the most despised cur in the street and bring them home and give them something to eat, and if they were weak for want of food he would put up a plea to his father to let him keep the dog in the household for a day or two. I remember one of the derelicts he picked up, a little mongrel, it was in the dead of winter that Sid happened upon this animal, he brought it home and after a great deal of coaxing

and pleading he was allowed to keep him until spring, providing that it did not do damage to any one or anything. Sid assured his father that he would see to it that the dog would act like a gentleman should, and thus Jerry became an associate member of the household. In due time the entire family got to like Jerry, and when spring came not one of the family would think of giving him away or turning him out, but—his place of high esteem was doomed to a great fall, for as the spring came on, Jerry began to get the spring fever, or as some Great Authors say "The Call of the Wild" was calling him, anyway he began to act up. One morning when Sid came down to let him out of the wood shed, he found a hole scratched through the wall and no Jerry to be found. After this, Sid was more particular about the dogs he made friends with, but he always managed to have one. This is about the first important event that happened in "Sid's" life since I met him. Next week if Sid does not write to Bill I will continue on with the story of his life.

Soldier's Memorial

Mr. Editor:

The fact that there is so much discussion on the subject and that people are writing letters to the paper to try to justify themselves is proof that they feel that they need justifying. The idea of putting up a monument for our dead heroes is all right if Lacombe can afford to have both a monument and a hall, but I am sure that some of the boys who have come back suffered even more than some of those who were killed. Why then should they not be honored? Perhaps you think it is a pity they were not killed also? And it is utterly absurd to worry who is to keep a building in years to come. I understand the impression that when some of us are dead and gone, Lacombe will be just as able to keep up one public building as it is now, perhaps more so. There are thousands of Memorial Halls on this continent and I never heard of any of them going to decay because one man or group of men died. What about the Grand Army Halls in the States? Are they used any the less, are their parades any smaller because there are only one or two G. A. R. men left? No, the finer things in human nature die hard, thank God, and, even in Lacombe some few will struggle on and keep smiling. Again a monument might be a credit to Lacombe, but would Lacombe be a credit to a monument? It is only a few years ago since the cemetery was a disgrace to the district, and it is nothing to brag about yet. It seems a queer thing that people who could neglect their own dead for so many years can suddenly become so concerned over other peoples dead when it is suggested to do something for the living. I consulted one mother who has one boy dead in France, and she said that she thought her boy was quite safe and happy under the sunny skies of France with his little white cross above him and she was willing to make any sacrifice to help the boys who have come back to keep safe and happy. And just here I will say that it is those who have to sacrifice who are willing to give. And those who have plenty to give and might have more if they did not persist in keeping Lacombe back, think, Heaven knows why, that they will make more money out of a small town than a large one, (never mind the time for a settlement is overdue) these are the knackers.

A monument would not cost much, especially if we shifted cost of the park on to C.P.R., but even if they gave us a grass plot a monument would look rather grotesque covered with coal dirt, with the devastated day block for a background. But nothing could be more appropriate than a hall in which there would be a clubroom with its roll of honour in a conspicuous place, where the veterans and other young people could visit, read, write, have debates, games, theatricals and socials, perhaps even dances. Across the hall would be a room for the use of the Patrons, where every woman's society could meet. I appeal to you, women can you afford to let it be turned down? Do your young people need it or your children who are growing up? Can't you who want a monument give in gracefully and be satisfied with a beautiful brass tablet in the entrance hall. Well, anyway we are keeping tab to see how much you give to the 40,000 dollar alien school, while Lacombe has not even one show place and has done nothing for her returned men, although she could put up a big enough hall when she sent them off. A Political Merger.

Two somewhat significant developments in the Alberta Political field are now announced. The U.F.A. are proceeding to enter the provincial as well as the federal arena, and will next week hold their first district convention for the purpose of nominating a provincial candidate. This nomination will be for the seat left by the death of the speaker of the house Hon. C. W. Fisher.

It may be inferred from the farmers' action in this particular case that they purpose taking part in all provincial contests along lines similar to those of their federal contests. Their political organizations are sufficiently elastic to permit of such a course, and the same platform of independent democracy, whatever that may yet be found to mean will serve for the candidates to stand upon.

Along with this new departure there goes the suspension of the Alberta Non-Partisan League. An agreement has been reached by which that organization is merged with the United Farmers' political organization, the latter taking under its wing, it is assumed, the two Non-Partisan members, Mrs. L. C. McKinney and Mrs. Jas. Weir. Whether these two independents will continue under U.F.A. favor or not will probably be decided when a new election is brought on. The Non-Partisan official organ will continue publication, it is stated, but is likely to undergo some changes to fit its new ownership and control.

The merger is a logical outcome of recent political tendencies. The farmers have started out upon so ambitious a campaign and have chosen for themselves so large a field to work in, that amalgamation with a lesser but sympathetic organization was naturally to be looked for, since it is an acknowledged part of the U.F.A. scheme that other bodies with similar aims and spirit will be taken under its fold. A question arises, however as to whether this policy of political absorption may not weaken the individuality of the farmers' movement. Somewhat later it will be found that no body of people however democratic or non-partisan are sufficiently identical with farmers in sympathy or purpose to coalesce with them on a permanent political basis.

"I SEE YOU" and always do, because "here" you'll always find "good eyesight." What we want is for you to "COME AND SEE US" and let us compare notes. "You need glasses", we have them. That's plain sailing and next thing is to "act." Those who "act" and WEAR OUR GLASSES never have trouble with eyesight. Try us and be convinced.

LaVesta News

The crops in this neighborhood are looking good, but are in need of rain, the clouds bore abundant showers east, west, north and south, but only vouchsafed a few mercy-drops for us. Indians have been busy brushing at several farms and breaking in fall swing, indications pointing to a large increase in acreage for crop next year.

The well drillers are at work. Mr. Czossa had a well sunk on his farm last week.

Road work has been in progress, and from the finished product we would recommend our overseer to any district in need of really efficient roadmaker.

School, which started in March, continues on through midsummer holidays with a two-weeks vacation in September.

Dominion Day was well observed by many of the Lavestaites who made a large exodus to Rimbey to see the sports there. After viewing the scientific exhibition of baseball shown, one of the Lavesta visitors was heard to say that they ought to arrange for a contest between Edmonton Swifts and the Lavesta girls baseballists.

Picnics are the order of the day, and it has been rumored that even Lavesta is planning to celebrate in the near future.

Mrs. Hansen, of Blindman, and daughters were visitors on Sunday 29th. In company with Mr. Bachur and family they spent the afternoon at Mr. Pregoda's home, where they met several of the neighbors.

Mr. and Mrs. Marek are the proud possessors of a young daughter.

Your scribe in reading the market reports, noted that beans were quoted at \$2.75 a bushel at Montreal, and on enquirers was informed that they cost 20¢ a pound, which means \$20.00 a bushel at Lavesta. Looks as if there were too many niggers in the woodpiles between Montreal and Lavesta. And yet some wonder that the disease of Bolshevism is epidemic in some of our western cities, and its virus has enfeebled the intellects

of even some of our western teachers.

Lavesta school is looking for a good second-hand organ. Write T. N. Wright, postmaster.

Work is progressing on the Bentley Rimbey Branch of the Blindman Valley Railway, and it is expected to be ready for traffic in the early Autumn. Rumor is rife that the extension of this road is to pass through either Iola or Lavesta. In either case it would be a great boon to the farmers of this district who have to make a two day's trip with a load of produce for shipment.

Mr. Bergen has been joined by his wife, and their home will be a pleasant addition to hospitable homes of Lavesta.

Miss Emma Bachur is paying a short visit to her home. We welcome her smiling face amongst us once more.

Gordon Wright who has been working the farm at Rimbey is again with us.

A piece of machinery shipped from Ontario to Lavesta as December has not yet arrived at Bentley. Has it gone looking for strikebreakers for the railway.

Teachers and pupils took a half holiday on Friday, to attend the picnic at Iola. Messrs. Wright and Bachur provided teams which carried 25 pupils, and quite a number of the Lavesta folk attended in their own conveyances.

Herman Schweiger and family of Ponoka, came in their car, and a very successful picnic was held. After a bountiful free dinner sports were the order of the day. The junior baseball clubs of Iola and Lavesta put up a very closely contested game, which resulted in a victory for Iola, the score card showing a score of 19 runs for Lavesta and 20 for Iola. Races followed and another game between the senior baseball club of Iola and a team of outsiders resulted in another victory for Iola by 25-21. A horse race and jumping contest then followed. The Lavesta people carried off a fair share of honors, and returned home voting the picnic a grand success and hoping at some later period to return the compliment to our Iola hosts.

Rimbey News

The following are the results of the Rimbey Public School examinations for midsummer 1913.

Grade VII—Marjorie Waters, (H), Muriel Brooks, Laura Byers, Parsons Cross, Laurie Richards, Earl Rimbey, Del Waters, Lydia Allison, Ruby Smith, Irene Woods, Grade V—Nelson Cumberland, Ernest Marshall, Lester Saunders, Hazel Woods, Mildred Crommie, Albert Marshall, (C). Grade IV—Lulu Bunch, George Allison, Arthur Cumberland, Martha Byers, Wilfrid Scott, Ernest Allison (C), James Smith, (C), Luther Smith, (C).

Arbordale News

The shower on Saturday night refreshed the growing crops.

F. B. Stewart is building a roomy addition to his home.

Mr. and Mrs. Calkins are the proud parents of a baby boy.

Mrs. C. G. Oliver, daughter and little son, of Onawa, Iowa, are guests at the Fred Butcher home.

They expect to stay for two months and will call on their Iowa friends.

J. R. Butcher and wife, of Colfax, Wash., was visiting with his brother Fred, is much impressed with the country, and calls it the "Paradise of America." He expects to return in the fall with a view of investing. Mr. and Mrs. Butcher spent a day at Calgary fair, and were greatly pleased with the exhibit.

Thomas Alexander has material on the ground for a modern farm home. Building operations will commence soon.

The songs of the robins and tractors breaks the quiet of the early morning.

Lewis Madison, a pioneer resident of Arbordale, was calling on friends last Sunday. He is now located in Red Deer, where the family moved last spring from Utah, in obedience to the call of the North.

Arbordale was well represented at Aspen Beach last Sunday.

R. Reister and family, now joy ride in a new Overland.

We regret very much that our obliging mail carrier Will Stewart retires from the service soon.

Mrs. C. W. Gaiskell and children, will spend the summer with relatives in New York.

The Real Future of the Airplane

We have felt for some time that the future of the airplane should be taken in hand by some disinterested person and definitely settled. Newspapers and magazines feature writers have got the problem all askew, and the too indulgent public is at present in a sort of seething misery from headlines and illustrations that do little else than catch the eye and muddle the brain.

If our memory, after our reading for the last six months, is not at fault, airplanes are to carry first class mail at nineteen cents an ounce, transport millionaire suburbanites to and from their offices at \$4.00 a mile, make forty minute trips between Montreal and Winnipeg, deliver groceries on time, cross the Atlantic in ten hours, climb Pike's Peak and annihilate the crowded traffic nuisance. Besides all this we seem to recall dimly fifty or sixty other entirely worthy projects which enterprising flying companies are going to carry out within the coming twenty-four months.

It is obvious that the general reading public can not hope to form concrete ideas out of all this jumble. Even barbers grow confused when they try to enlighten their victims over what they expect to see before long. It is because of this that we hereby take upon ourselves task of pointing out, in a few well-chosen words, just what the airplane industry may be expected to accomplish in the next five years. It must be borne in mind that we have no interest, immediate or remote in any airplane enterprise, the only compulsion having gone out of business some time ago.

For the next two years airplanes will be used largely for exhibition purposes and feature stor-

Automobile Repairs by Automobile Mechanics

Pratt's Garage

"Where you get what you pay for."

Phone 65 Lacombe

ties. Air routes will be chartered, companies organized, stock sold, and landing places established on all unroad groups of towns.

Speculations, both cerebral and financial will be rife.

At the beginning of the third year, restriction and regulation of airplane traffic will be set in and legislatures will discuss and pass laws that will bear more or less upon the evils that have arisen.

The cut-out nuisance will be attacked and aviators will be required to pass intelligence tests and take out insurance for their grandmothers. F.E.I. will abolish aviation and organize a national anti-air-traffic crusade.

Within five years aerial joy riding will be comparatively safe and highly pleasurable, and a definite reaction set in against it. It will be denounced from the pulpit, the street corners, and the soft drink dives.

In 1930 the senate will pass an amendment prohibiting aviation. This amendment will be ratified by the senate and we shall all go

back to our former imaginative routine—Fird cars and profanity.

Health Exhibit at the Fair.
The Alberta Government Health Department will have a Health Exhibit at the Lacombe Fair to be held on July 24 to 26. This exhibit will be in charge of a Health Inspector and two trained nurses who will demonstrate what is being done to improve the health of our people. It will be most interesting, and will be a big feature at the fair.

Farms Wanted

E. Walter Simpson has received a request from the Soldier's Land Board to submit to them a list of lands suitable for purchase by soldier settlers, under the Soldier's Settlement Act. If you have a farm for sale, it will be to your interest to call on Mr. Simpson and give him full particulars.

The Lacombe Elevator is now closed until after harvest.
